**The Normans in the South, 1016-1130** John Julius Norwich,2011-11-03 This book is about the 'other' Norman Conquest. It is the story of Robert Guiscard, perhaps the most extraordinary European adventurer between Caesar and Napoleon. In one year, 1084, he had both the Eastern and Western Emperors retreating before him and one of the most formidable of medieval Popes in his power. It is also the story of his brother Roger, thanks to whom he conquered Sicily from the Saracens; and of Roger's descendants, notably his son Roger 11, who converted his father's achievement into a cosmopolitan and cultivated kingdom whose surviving monuments still dazzle us today. The Normans in the South is the first of two volumes that recount the dazzling story of the Norman Kingdom of Sicily. The second volume The Kingdom of the Sun is also being reissued in Faber Finds. 'Diligence, narrative skill, and a scholarship fired by enthusiasm' Lord Kinross, Sunday Telegraph 'I found the book very enjoyable indeed. It is beautifully written.' Nancy Mitford

**Aviation Weather Services** National Aviation Weather Services Committee, Commission on Engineering and Technical Systems, Division on Engineering and Physical Sciences, National Research Council, 1995-11-16 Each time we see grim pictures of aircraft wreckage on a rain-drenched crash site, or scenes of tired holiday travelers stranded in snow-covered airports, we are reminded of the harsh impact that weather can have on the flying public. This book examines issues that affect the provision of national aviation weather services and related research and technology development efforts. It also discusses fragmentation of responsibilities and resources, which leads to a less-than-optimal use of available weather information and examines alternatives for responding to this situation. In particular, it develops an approach whereby the federal government could provide stronger leadership to improve cooperation and coordination among aviation weather providers and users.

The Last German Victory Aaron Bates, 2021-12-22 Operation Market Garden - the Allied airborne invasion of German-occupied Holland in September 1944 - is one of the most famous and controversial Allied failures of the Second World War. Many books have been written on the subject seeking to explain the defeat. Historians have generally focused on the mistakes made by senior commanders as they organized the operation. The choice of landing zones has been criticized, as has the structure of the airlift plan. But little attention has been paid to the influence that combat doctrine and training had upon the relative performance of the forces involved. And it is this aspect that Aaron Bates emphasizes in this perceptive, closely argued and absorbing re-evaluation of the battle. As he describes each phase of the fighting he shows how German training, which gave their units a high degree of independence of action, better equipped them to cope with the confusion created by the surprise Allied attack. In contrast, the British forces were hampered by their rigid and centralized approach which made it more difficult for them to adapt to the chaotic situation. Aaron Bates's thought-provoking study sheds fresh light on the course of the fighting around Arnhem and should lead to a deeper understanding of one of the most remarkable episodes in the final stage of the Second World War in western Europe.
