CJ/T 395-2012 Translated English of Chinese Standard. (CJT 395-2012, CJ/T395-2012, CJT395-2012)

<https://www.chinesestandard.net>,2019-04-27 This Standard specifies the gas-fired heating and hot water condensing combi-boilers terms and definitions; classification and model; requirements for material, structure and safety; performance requirements; test method; inspection rules; marking; precaution and instruction; packing; transport and storage.

The Trailsman #395 Jon Sharpe,2014-09-02 All it takes is one shot... When Skye Fargo receives a desperate request for help from his old friend Colonel Durant, he knows something must be very wrong. But when the Trailsman learns that the Lakota and Cheyenne nations are being stirred to bloody war against the whites, he must race against time—and a conniving, deadly foe—to stop a slaughter.

Environmental Hydraulics V.P. Singh,Willi H. Hager,2013-06-29 Triggerd primarily by ill effects of polluted air, soil and water resources on living species, public concern for environmental quality has been growing during the past four decades or so. One manifestation of this concern is found in occurrence of public debates as well as in the demand for full environmental impact assessment before a water-resources project is approved. Engineering soundness and economic feasibility are no longer sufficient criteria for construction of hydraulic works. As a result, environmental considerations have become very much a part of hydraulic analyses. In response to growing environmental concerns, the field of hydraulics has expanded and a new branch, called Environmental Hydraulics, has emerged. The focus of this branch is on hydraulic analyses of those environmental issues that are important for protection, restoration, and management of environmental quality. The motivation for this book grew out of the desire to provide a hydraulic discussion of some of the key environmental issues. It is hoped that the book would serve to stimulate others to write more comprehensive texts on this subject of growing

importance.

The Oxford Companion to Comparative Politics Craig N. Murphy, 2012-10-25 Fills a gap in scholarship on an increasingly important field within Political Science. Comparative Politics, the discipline devoted to the politics of other countries or peoples, has been steadily gaining prominence as a field of study, allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit.

Fractional Programming I.M. Stancu-Minasian, 2012-12-06 Mathematical programming has known a spectacular diversification in the last few decades. This process has happened both at the level of mathematical research and at the level of the applications generated by the solution methods that were created. To write a monograph dedicated to a certain domain of mathematical programming is, under such circumstances, especially difficult. In the present monograph we opt for the domain of fractional programming. Interest in this subject was generated by the fact that various optimization problems from engineering and economics consider the minimization of a ratio between physical and/or economical functions, for example cost/time, cost/volume, cost/profit, or other quantities that measure the efficiency of a system. For example, the productivity of industrial systems, defined as the ratio between the realized services in a system within a given period of time and the utilized resources, is used as one of the best indicators of the quality of their operation. Such problems, where the objective function appears as a ratio of functions, constitute fractional programming problems. Due to its importance in modeling various decision processes in management science, operational research, and economics, and also due to its frequent appearance in other problems that are not necessarily economical, such as information theory, numerical analysis, stochastic programming, decomposition algorithms for large linear systems, etc., the fractional programming method has received particular attention in the last three decades.
