Boeing 757-767 Study Guide Rick Townsend, 2021 The Boeing 757/767 Study Guide is a compilation of notes taken primarily from flight manuals, but also includes elements taken from class notes, computer-based training, and operational experience. It is intended for use by initial qualification crewmembers, and also for systems review prior to recurrent training or check rides. The book is written in a way that organizes in one location all the buzz words, acronyms, and numbers the average pilot needs to know in order to get through qualification from an aircraft systems standpoint. The book covers the Boeing 767-300 and 757-200 series aircraft.

Boeing 757/767/777 Philip Birtles, 1999 Beskriver de amerikanskbyggede passager- og fragtfly Boeing 757, 767 og 777 herunder udviklingshistorie, flydata og de flyselskaber, der benytter flytyperne

Boeing 757 and 767 Thomas Becher, 1999 In the grand scope of Boeing's success as the world's leading builder of civil jetliners, the 757 and 767 are anomalies in that they were designed and built simultaneously -- the 757 as a single-aisle airliner for domestic routes, the 767 as wide-bodied transcontinental carrier. Author Thomas Becher describes the tandem development of the two airliners with a similar appearance but very different roles. Eight pages of color photographs complement a gallery of black-and-white shots, and help delineate the difference and display the similarities between the two types.

Boeing 767 Proximity Evaluation with F/A-18C and S-3B Aircraft, 2001 The Boeing Company participated in the Future Strategic Tanker Aircraft program which was intended to provide aerial refueling and aerial transport capability to the United Kingdom Royal Air Force under a Private Finance Initiative. Boeing contracted NAWCAD Patuxent River, Maryland, under a commercial service agreement to determine if an area of acceptable wake turbulence existed in the proximity of a 767 aircraft in order to perform the aerial refueling mission. This was accomplished by evaluating the 767 aerodynamic and wake turbulence effects on two receiver aircraft (F/A-18C and S-3B) at locations behind the 767, which approximated potential aerial refueling engagement areas. During the period of 22 and 23 June 2000, three F/A-18 and three S-3B flights were flown totaling 5.8 F/A-18 flight-hours, 6.7 S-3B flight-hours, and 12.5 767 flight-hours. A Lear 35 cinematography aircraft was used to document test results. The test program consisted of proximity evaluations only with no aerial refueling pods installed on the 767 aircraft and no receiver-to-tanker engagements. All flights were conducted within the Patuxent River restricted or local warning areas. At the positions evaluated, areas of acceptable wake turbulence existed for the F/A-18C and the S-3B in the proximity of the 767 aircraft in order to perform the aerial refueling mission. Recommend that testing continue to evaluate the 767 tanker aircraft.

Boeing 767 Philip Birtles, 1999 The 767 is one of the aircraft designed to take Boeing into the 21st century. This text examines in detail the history, design, production and service of the Boeing 767. It includes a full technical specification including tabular detail of all models and variants, and a production listing.
