GB/T 846-2017 Translated English of Chinese Standard. (GBT 846-2017, GB/T846-2017, GBT846-2017)

<https://www.chinesestandard.net>,2017-11-17 This Standard specifies the type and dimension, technical conditions and marking of cross-recessed countersunk (flat) head tapping screws. This Standard is applicable to the cross-recessed countersunk (flat) head tapping screws with Thread Specification of ST 2.2 ~ ST 9.5, and Product Grade A.

JJG 846-2015 Translated English of Chinese Standard (JJG 846-2015, JJG846-2015)

<https://www.chinesestandard.net>,2023-03-24 This Regulation applies to the first verification, follow-up verification and in-use inspection of dust concentration measuring instruments (hereinafter referred to as dust meters). 2 Overview A dust meter is an instrument used to measure the mass concentration of particulate matter suspended in the air. It can display concentration value or output concentration signal. The principle of the dust meter is mainly to convert the dust concentration signal into an electrical signal by light scattering method, Å-ray method and light transmission method, and then display it through the secondary instrument. A dust meter is generally composed of a dust concentration conversion component, a sampling head (including a cutter or separator), an air pump, a power supply, and a circuit. Some dust meters also have structures or functions such as flow meters, sampling time display or setting, sampling volume display or setting, and signal output. According to the measurement range, the dust meter is divided into high concentration dust meter (the measurement range is generally 10mg/m³~1000mg/m³) and low concentration dust meter (the measurement range is generally 0.1mg/m³~10mg/m³). 3 Metering performance requirements 3.1 Indication error Indication error shall not exceed ±20%. 3.2 Indication repeatability Indication repeatability shall not exceed 10%. For dust meters based on the optical principle, if a standard light-transmitting film plate is used for testing, the repeatability

Jesus Research James H. Charlesworth,Brian Rhea,Petr Pokorny,2014-01-23 This volume explores nearly every facet of Jesus research -- from eyewitness criteria to the reliability of memory, from archaeology to psychobiography, from oral traditions to literary sources, and from narrative criticism to Gospel criticism. Bringing together a wide variety of topics and perspectives in one volume, this ambitious collaborative enterprise casts light on important debates and encourages creative links between ideas new and old. This distinguished collection of articles by internationally renowned Jewish and Christian scholars originates with the Princeton-Prague Symposium on Jesus Research. It summarizes the significant advances in understanding Jesus that scholars have made in recent years, chiefly through the development of diverse methodologies. Even readers who are already knowledgeable in the field will discover unique angles from well-known New Testament scholars, and all will be brought up to speed on the current state-of-play within Jesus studies.
