Me 210/410 Zerstörer Units Robert Forsyth, 2019-11-28 Intended as a progressive development of the twin-engined Bf 110 Zerstörer ('destroyer' or heavy fighter), the Me 210 first took to the air in September 1939. However, due to a lack of sufficient flight-testing before being declared service-ready, the Me 210 suffered from a less than satisfactory reputation in respect to its flight characteristics and weak undercarriage. After enhancements were made to the fuselage and wings, and the power of the plane was increased, the Me 210 became the Me 410 in late 1942. By this stage of the war much was expected of the two types, which were forced to fly in very dangerous skies over North Africa and in the defence of the German homeland. Both aircraft were deployed as heavy fighters, fighter-bombers, reconnaissance platforms and interceptors, seeing service with a number of different units. The Me 410 was fitted with 30 mm cannon, 21 cm underwing mortars and the colossal 5 cm BK cannon that was intended to pack a punch against the USAAF's four-engined bombers which threatened the Reich in large numbers from 1943 onwards. In this title, supported by contemporary photography and full-colour artwork, Robert Forsyth tells the complex story of the Me 210 and 410, detailing their development and assessing their capabilities as combat aircraft.

The Messerschmitt 210/410 Story Jan Forsgren, 2019-09-17 In 1938, the Reichsluftfahrtministerium (German Air Ministry, RLM), issued a requirement for a new twin-engine heavy fighter to replace the Me 110. This type of combat aeroplane was known as Zerstörer (Destroyer). The first prototype flew in September 1939. The Me 210 proved very difficult to fly, having numerous deficiencies. It was said to be deadlier to its crews than the enemy. Nevertheless, the Luftwaffe ordered the Me 210 into production. Operational trials began in late 1941, but it was eventually acknowledged that the aircraft had to be redesigned in order to be accepted into Luftwaffe service. The whole Me 210 debacle proved a huge scandal. A redesigned variant, the Me 410 began to reach Luftwaffe units in mid-1943. Even if the Me 210 and Me 410 were similar in appearance, the latter had to be redesigned to avoid the extremely poor reputation of the Me 210. The Me 410 proved a quite successful aeroplane, being used as a heavy fighter and for reconnaissance duties. Its closest Allied equivalent was the British DH 98 Mosquito. More than 1,500 Me 210/410s were built in Germany and Hungary, with only two Me 410s surviving today.

The View from #410 Jean K. Mason, 2010 Amazon.com customer review: (5 Stars) This is a book that I didn't want to

finish! It is the real story of what happens in cohousing through the first person account of a deeply involved participant from the earliest planning stages through the building, move in and several years of settling in. This is a detailed look at Cambridge Cohousing, a Massachusetts urban intergenerational community of 41 households. As a member of a `Forming group in Westport, MA., I found my self nodding YES constantly as I moved with the author through the engaging, exhausting and sometime frustrating and more often thrilling process of their complex journey. The book gave me an inside view - it made me feel as if I were there. The book gave me hope, that `we' might do it...and why it takes so much time. I understood more about my intuitive desire NOT to live in `senior's only community and what was so positive about families and people of all ages living in an interdependent community. I have been a student of Cohousing for about 2 years; eager to learn about this remarkable process of building community through books, articles, visits to established communities and meetings. The View from 410 is the first publication that illuminates the intense process of what it really takes to create a Cohousing community. This is a book for someone who already knows a little about cohousing and wants to understand the intricate dynamics and daily experiences of creating the shared living concept that is Cohousing. Other books that I've read were very useful in describing the history and the generic processes of creating cohousing, with brief examples, of the variations in urban and rural cohousing in the US and Denmark. Once you know the basics of cohousing, you'll be ready to dive into the View from 410.

The Origins of England 410-600 Martyn J. Whittock, 2023-08-10 The Origins of England (1986) gives a comprehensive overview of the crucial period of migration and settlement that can be seen as the beginning of English history. It takes into account recent discoveries and debates on the origins of the English, their arrival and conquest of England, and the social life and culture of the settlers. Topics covered include the resistance of the British to the English invaders, the relation of the English to the crumbling Roman society, the founding of the kingdoms and the Christian missionaries. Besides archaeological evidence, the author considers the evidence of place names, the visual arts and literary and legendary sources.
