Energy Efficient Cooperative Wireless Communication and Networks Zhengguo Sheng,Chi Harold Liu,2014-11-11

Compared with conventional communications, cooperative communication allows multiple users in a wireless network to coordinate their packet transmissions and share each other's resources, thus achieving high-performance gain and better service coverage and reliability. *Energy Efficient Cooperative Wireless Communication and Networks* provides a comprehensive look at energy efficiency and system design of cooperative wireless communication. Introducing effective cooperative wireless communication schemes, the book supplies the understanding and methods required to improve energy efficiency, reliability, and end-to-end protocol designs for wireless communication systems. It explains the practical benefits and limitations of cooperative transmissions along with the associated designs of upper-layer protocols, including MAC, routing, and transport protocol. The book considers power efficiency as a main objective in cooperative communication to ensure quality-of-service (QoS) requirements. It explains how to bring the performance gain at the physical layer up to the network layer and how to allocate network resources dynamically through MAC/scheduling and routing to trade off the performance benefits of given transmissions against network costs. Because the techniques detailed in each chapter can help readers achieve energy efficiency and reliability in wireless networks, they have the potential to impact a range of industry

areas, including wireless communication, wireless sensor networks, and ad hoc networks. The book includes numerous examples, best practices, and models that capture key issues in real-world applications. Along with algorithms and tips for effective design, the book supplies the understanding you will need to achieve high-performing and energy efficient wireless networks with improved service coverage and reliability.

The NURBS Book Les Piegl, Wayne Tiller, 2012-12-06 Until recently B-spline curves and surfaces (NURBS) were principally of interest to the computer aided design community, where they have become the standard for curve and surface description. Today we are seeing expanded use of NURBS in modeling objects for the visual arts, including the film and entertainment industries, art, and sculpture. NURBS are now also being used for modeling scenes for virtual reality applications. These applications are expected to increase. Consequently, it is quite appropriate for *The NURBS Book* to be part of the Monographs in Visual Communication Series. B-spline curves and surfaces have been an enduring element throughout my professional life. The first edition of *Mathematical Elements for Computer Graphics*, published in 1972, was the first computer aided design/interactive computer graphics textbook to contain material on B-splines. That material was obtained through the good graces of Bill Gordon and Louie Knapp while they were at Syracuse University. A paper of mine, presented during the Summer of 1977 at a Society of Naval Architects and Marine Engineers meeting on computer aided ship surface design, was arguably the first to examine the use of B-spline curves for ship design. For many, B-splines, rational B-splines, and NURBS have been a bit mysterious.

The Asian 21st Century Kishore Mahbubani, 2022 This open access book consists of essays written by Kishore Mahbubani to explore the challenges and dilemmas faced by the West and Asia in an increasingly interdependent world village and intensifying geopolitical competition. The contents cover four parts: Part One The End of the Era of Western Domination. The major strategic error that the West is now making is to refuse to accept this reality. The West needs to learn how to act strategically in a world where they are no longer the number 1. Part Two The Return of Asia. From the years 1 to 1820, the largest economies in the world were Asian. After 1820 and the rise of the West, however, great Asian civilizations like China and India were dominated and humiliated. The twenty-first century will see the return of Asia to the center of the world stage. Part Three The Peaceful Rise of China. The shift in the balance of power to the East has been most pronounced in the rise of China. While this rise has been peaceful, many in the West have responded with considerable concern over the influence China will have on the world order. Part Four Globalization, Multilateralism and Cooperation. Many of the world's pressing issues, such as COVID-19 and climate change, are global issues and will require global cooperation to deal with. In short, human beings now live in a global village. States must work with each other, and we need a world order that enables and facilitates cooperation in our global village.

TUY?N T?P M?T ??I NGÔ TÔN LONG,2014 About the Book: The third millennium of the Christian era came with wars, one against infidels and another on terrorism, which were more than enough for a miserable Vietnamese, Ngô Tôn-Long- former lecturer on pedagogy and philosophy at Dalat University, 1968-1975, born in the beginning of the Second World War, grown up during the French revived colonial war, and terminated at the end of the American anticommunist war. Born again neither by might nor by power and having lived his faith for thirty years now, he was moved to study scriptures ancient and not so ancient and has been enabled to have his studies printed (on demand)-a dozen or so of the titles are dedicated to the uprooted, displaced, and dispersed people like him as well as peoples like his-yet not so appropriately published that most of his old acquaintances scattered to North America actually know only of his death forty years ago. Being no native speaker of English, he had never thought of writing anything whatsoever in this language till the day he was planted in the capital Adelaide of South Australia. Neither religions nor theology had been of his studies; instead, it was mathematics and physics, pedagogy and philosophy. Better read no books than believe only one, he used to seriously study every of all the books that happened to fall into his hands or to run on to himself-the written whatsoever and the living whomsoever. Years ago, he was kept on an island of refuge in a time just enough for him to study the accusation bold and public Christians and Jews are infidels; People of the Book, they have distorted their Scripture! Twenty years of self-incarceration inside Adelaide assured him of his in-depth studies on the books of each people-the Holy 22 or 24 (scriptures) and the Holy 46 or 39 (of a dozen bibles) plus dozens of not-so-holy books. Then he was brought on the eagles' wings-from a southeastern island of the old world-across the ocean Pacific and crossing both the International Time Line and the Equator at about a same night time (so that he could see nothing down there, Pacific or not) to some northwestern lands of the new world (of names like Angels and Real-Mount). There, in the spirit of Yeh-Vah, he was set down amidst very many bones that were indeed very dry, as they themselves acknowledged it, saying, Our bones are dry, our hope is lost, and we are cut off. They were actually eating and drinking and enjoying their death on the day of their independence from Yeh-Vah while he was standing on level 102 of the Empire State Building with a Holy Scripture . . . comparable to the Bible . . . the Most Correct . . . containing the Fullness of the Everlasting Gospel.

Attosecond and XUV Physics Thomas Schultz,Marc Vrakking,2013-11-13 This book provides fundamental knowledge in the fields of attosecond science and free electron lasers, based on the insight that the further development of both disciplines can greatly benefit from mutual exposure and interaction between the two communities. With respect to the interaction of high intensity lasers with matter, it covers ultrafast lasers, high-harmonic generation, attosecond pulse generation and characterization. Other chapters review strong-field physics, free electron lasers and experimental instrumentation. Written in an easy accessible style, the book is aimed at graduate and postgraduate students so as to support the scientific training of early stage researchers in this emerging field. Special emphasis is placed on the practical approach of building experiments,

allowing young researchers to develop a wide range of scientific skills in order to accelerate the development of spectroscopic techniques and their implementation in scientific experiments. The editors are managers of a research network devoted to the education of young scientists, and this book idea is based on a summer school organized by the ATTOFEL network.

The JGuy's Guide Joseph B. Meszler, Shulamit Reinharz, Liz Suneby, Elizabeth Suneby, Diane Heiman, 2013 What does it mean to be a young Jewish man? Who am I? How do I feel about myself? Do I seem cool? Do I fit in? These overarching teen boys' concerns are addressed head on through the voices of contemporary Jewish teens, men, and biblical and historical stories. The JGuy's Guide helps young teens see how Judaism can help them navigate the often choppy waters of adolescence while it strengthens Jewish identity and pride. This interactive book encourages personal reflection and discussion, making it ideal for the individual teenager as well as education and discussion groups. Its candid approach explores dilemmas boys face in their daily lives: the pressure to excel at sports, school and social life; the courage to speak up when friends make questionable choices or parents act hypocritically; and more. Like the Talmud, the book offers many perspectives and reflection questions to help boys find their own truths.

Theoretical and Comparative Perspectives on Nationalism Taras Kuzio, 2007-12-17 This volume brings together 15 articles divided into four sections on the role of nationalism in transitions to democracy, the application of theory to country case studies, and the role played by history and myths in the forging of national identities and nationalisms. The book develops new theories and frameworks through engaging with leading scholars of nationalism: Hans Kohn's propositions are discussed in relation to the applicability of the term 'civic' (with no ethno-cultural connotations) to liberal democracies, Rogers Brubaker over the usefulness of dividing European states into 'civic' and 'nationalizing' states when the former have historically been 'nationalizers', Will Kymlicka on the applicability of multiculturalism to post-communist states, and Paul Robert Magocsi on the lack of data to support claims of revivals by national minorities in Ukraine. The book also engages with 'transitology' over the usefulness of comparative studies of transitions in regions that underwent only political reforms, and those that had 'quadruple transitions', implying simultaneous democratic and market reforms, as well as state and nation building. A comparative study of Serbian and Russian diasporas focuses on why ethnic Serbs and Russians living outside Serbia and Russia reacted differently to the disintegration of Yugoslavia and the USSR. The book dissects the writing of Russian and Soviet history that continues to utilize imperial frameworks of history, analyzes the re-writing of Ukrainian history within post-colonial theories, and discusses the forging of Ukraine's identity within theories of 'Others' as central to the shaping of identities. The collection of articles proposes a new framework for the study of Ukrainian nationalism as a broader research phenomenon by placing nationalism in Ukraine within a theoretical and comparative perspective.

The Quest for an Ideal Youth in Putin's Russia II Jussi Lassila, 2014-04-15 Government-organized yet scandal-

stricken, Nashi inspires everything from broad support to a reluctance to accept all implications of Putin's political system. This volume shows how Nashi conceptualizes an ideal youth within the framework of an official national identity politics and as an attempt to mobilize apolitical youth.
